

# Sustainable Development Goals

## Lesson 6

### Goal 3 – Good Health and Well-being (2)

## Read and Answer

- Every year more than 60 million Americans die due to heart disease.
- 69 million people died from AIDS-related illnesses in 2019.

*Have any diseases occurred in your country in recent years?  
How did your country reverse the trend?*

# Read and Review

Nowadays, the health of mother and child has become a growing concern. In 2016, 2.6 million **newborns** died in the first month of life. They didn't have quality care and skilled treatment. What's more, **poor nutrition** causes 45 % of the child deaths under 5 years old.

Disease is also one of the factors that affect people's health. AIDS is now the leading cause of death among teenagers (aged 10–19) in Africa.

People in some countries do not have access to proper medical help. They don't have enough medical supplies and even health care workers, which also causes many health risks.

## **newborns**

babies from birth  
to four weeks

## **poor nutrition**

less source of  
materials to  
nourish the body

Fill in the blanks with the correct words.

- ① Many newborns died in the first month of life because of the \_\_\_\_\_ and \_\_\_\_\_.
- ② AIDS is a \_\_\_\_\_ disease. We need do protections to prevent this epidemic.
- ③ People in poor countries do not have \_\_\_\_\_ to proper medical help.
- ④ Those countries who don't have enough \_\_\_\_\_ and health care workers may cause many health risks.
